

Ellan Vannin Wealth Management

Sovereign Urban Investment Memorandum

The Birmingham Renaissance Fund

A 25-Year Strategic Investment Plan for Britain's Second City

Unlocking the HS2, Airport and Global City Opportunity

Prepared by:

Ellan Vannin Wealth Management (EVWM)

Urban Regeneration & Strategic Assets Division

Executive Summary

Ellan Vannin Wealth Management proposes the creation of the:

Birmingham Renaissance Investment Partnership (BRIP)

A sovereign-style investment vehicle designed to transform Birmingham into one of Europe's leading:

- business cities
- transport hubs
- aviation gateways
- technology centres
- cultural destinations

The investment thesis is based around a once-in-a-generation infrastructure opportunity:

HS2 + Birmingham Airport + City Centre Regeneration + Advanced Manufacturing

Birmingham is uniquely positioned to become the UK's second global city outside London.

HS2's Birmingham connection is expected to act as a catalyst for regeneration, with HS2-linked growth strategies identifying significant potential for new homes, jobs and economic uplift in the West Midlands.

Existing city regeneration plans already identify major opportunities around the city centre, including thousands of new homes, commercial space and public realm improvements around the HS2 Curzon Street area.

EVWM's proposal is to go beyond individual projects and create a coordinated investment ecosystem.

Investment Thesis

Birmingham's Strategic Advantage

Birmingham has four major assets:

1. Location

Birmingham sits at the centre of Britain's transport network.

Connected to:

- London
 - Manchester
 - Liverpool
 - Leeds
 - Bristol
 - Oxford
 - Cambridge
-

2. HS2 Gateway

HS2 creates a new economic relationship with London.

The strategic opportunity:

Birmingham becomes a London-connected business city with lower costs and greater space.

HS2 is expected to support regeneration around Birmingham Curzon Street and surrounding development areas.

3. Birmingham Airport

Birmingham Airport becomes the international gateway for the Midlands.

The opportunity:

Convert Birmingham Airport from a regional airport into:

Birmingham International Gateway

Existing analysis of Birmingham Airport has highlighted potential economic gains from improved connectivity and HS2-enabled access.

4. Industrial Base

The wider West Midlands economy contains:

- automotive
- aerospace
- engineering
- defence
- universities
- financial services

The opportunity is to create a modern innovation economy around these foundations.

The Birmingham Renaissance Fund

Fund Size

£10 billion

Investment period:

25 years

Capital sources:

Source	Contribution
EVWM	£2bn
Pension funds	£4bn
Institutional investors	£2bn
Government partnership	£2bn

Investment Pillars

Pillar One

Curzon Innovation District

"The New Birmingham Gateway"

The area around HS2 Curzon Street becomes Birmingham's equivalent of:

- King's Cross London
 - Canary Wharf
 - Manchester Spinningfields
-

Investment:

£2 billion

Development:

- offices
 - apartments
 - hotels
 - retail
 - conference facilities
 - innovation centres
-

Target:

25,000 jobs

Economic impact:

£1bn+ annual GVA uplift

Pillar Two

Birmingham Airport Global Gateway

Transforming BHX into the Midlands' International Hub

Birmingham Airport currently plays a major regional economic role, and aviation studies have identified additional growth opportunities linked to improved connectivity.

Investment:

£2.5 billion

Projects:

Airport City Birmingham

Develop:

- offices
 - hotels
 - logistics
 - conference facilities
 - advanced manufacturing
-

HS2 Airport Connection

Create:

Airport → Curzon Street

travel time:

10–15 minutes

Passenger Growth Target

Current airport:

approximately 13 million passengers annually (pre-pandemic scale)

Target:

25–30 million passengers annually

Economic impact:

Potential additional:

- £1bn+ annual regional economic activity
 - thousands of aviation-related jobs
-

Pillar Three

Birmingham Housing Renaissance

Creating a 21st Century City

The city needs large-scale housing growth to support:

- workers
 - students
 - entrepreneurs
 - families
-

Investment:

£3 billion

Development:

50,000 homes

including:

- city apartments
 - affordable housing
 - build-to-rent
 - urban villages
-

Economic impact:

Construction:

50,000+ jobs supported

Long-term:

higher labour mobility and productivity.

Pillar Four

Digital Birmingham

The UK's AI and Technology City

Create:

Birmingham Technology Quarter

Investment:

£1 billion

Focus:

- artificial intelligence
 - fintech
 - cybersecurity
 - robotics
 - advanced manufacturing
-

Anchor institutions:

- University of Birmingham
 - Aston University
 - engineering companies
-

Target:

100,000 technology-related jobs over 25 years

Pillar Five

Birmingham Waterfront & Cultural District

Create a world-class visitor economy.

Investment:

£750 million

Projects:

- canalside regeneration
 - museums
 - restaurants
 - hotels
 - entertainment venues
-

Objective:

Increase Birmingham's tourism economy.

Pillar Six

West Midlands Manufacturing Renaissance

The investment fund would support:

- factory redevelopment
 - industrial parks
 - clean energy
 - robotics
-

Investment:

£750 million

Target sectors:

- electric vehicles
- aerospace

- defence
 - energy systems
-

Birmingham Airport Strategy

From Airport to Economic Engine

A modern airport is not just transport infrastructure.

It is:

- business infrastructure
- tourism infrastructure
- logistics infrastructure

The EVWM model:

Airport + HS2 + Business District

creates a single economic zone.

Comparable examples:

- Frankfurt Airport City
 - Schiphol Airport District
 - Singapore Changi
-

Economic Impact Model

Total Investment

£10 billion

Direct Effects

Construction:

- 100,000+ job-years
-

Long-Term GDP Impact

Conservative scenario:

Productivity increase:

1%

West Midlands economy:

~£100bn scale

Impact:

£1bn annual GDP increase

Growth scenario:

2–3% productivity improvement:

£2–3 billion annual GDP uplift

25-Year Outcome

Potential additional economic output:

£50–75 billion cumulative

Employment Impact

Permanent employment:

Sector	Jobs
Technology	100,000
Airport economy	20,000
Construction/property	50,000
Professional services	30,000

Potential:

150,000–200,000 additional jobs

Investment Returns

Assets created:

- offices
 - housing
 - hotels
 - airport infrastructure
 - energy systems
-

Target returns:

Infrastructure:

6–8%

Real estate:

8–12%

Growth investments:

12%+

Strategic Positioning

The Birmingham Renaissance Fund becomes the central investment vehicle for:

The Midlands Economic Engine

Connected assets:

- HS2
 - Birmingham Airport
 - city centre
 - universities
 - manufacturing
 - housing
-

Final Recommendation

Ellan Vannin Wealth Management recommends establishing:

The Birmingham Renaissance Fund

as a sovereign-style partnership between private capital and government.

The objective:

Transform Birmingham from:

Britain's second city

into:

Europe's leading mid-sized global city.

HS2 provides the transport catalyst.

Birmingham Airport provides international access.

Regeneration provides the urban platform.

Private capital provides the long-term vision.

The opportunity is not simply to redevelop Birmingham.

It is to build the economic capital of the Midlands for the next century.
